§4.4 mixture: 20 seeds per point (band 1, $n = 2 \times 10^4$, $d = 1.4$, $w_3 = 0.2$ unless varied)
sample size n
band $1/\tau$
separation d ($t_3 = (0.7, 0.7 - d)$)
radius factor c (atoms $c\,t_k$)
smallest weight w_3
success rate
flat, 3 atoms
accurate
noiseless
max position error (flat runs)
